

Features != success: trying to take hold in the web QC niche market

Missing growth since 2020 - what are we doing wrong?

Some of our free-to-use features that did not yet reach a broader audience:

- 1) **Browser Session Replay** ("Behavior Reports"): Video of a Tab + Sniffed HTTP(s)/WS traffic + Console Logs

(Open this link for a sample: <http://bit.ly/3zpS1ae>)

- 2) **Advanced HTTP Archives** ("Event Snapshots"): Tab Screenshot + Sniffed HTTP(s)/WS traffic + Console Logs

(Open this link for a sample: <https://bit.ly/47zX70r>)

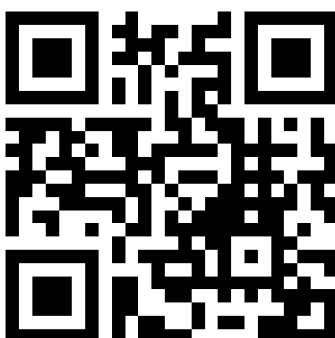

The samples have been created and hosted in the cloud by our free-to-use Browser extension "webQsee".
[web kju: si]

Disclaimer: on Socrates, we will only show features that are free to use / free of charge.

We want to know what needs to be done to reach more people (features, GUI, marketing, ...).
